

Environmental policy

1

Environmental Awareness and Engagement

Management will actively engage employees to foster a conscious and committed attitude towards climate and environmental initiatives and ensure strict adherence to all relevant environmental laws, regulations, and standards.

2

Environmentally Friendly Operations

We strive to minimize environmental impact through energy efficiency, waste management (including recycling and composting), and the selection of eco-friendly products and services.

3

Sustainable Procurement

We integrate environmental factors into the procurement process, prioritizing suppliers offering sustainable solutions, durable products, and minimal packaging and transportation.

4

Responsible Waste Management

We minimize waste generation, ensure proper waste handling, and maximize recycling, including composting of organic waste. Avoid hazardous substances and materials whenever possible.

5

Continuous Improvement, Collaboration, and Communication

We continuously enhance environmental performance through goal setting, we monitor and communicate environmental goals and achievements, and actively promote sustainable development.
